

TISSUE-DISPENSING APPARATUS

Abstract

A tissue-dispensing apparatus (10) is provided for attaching to a mounting surface (14), containing a tissue roll (16), and dispensing sheets of tissue fabric therefrom. In one embodiment, the apparatus (10) is a one-piece contoured sleeve (12). This one-piece sleeve (12) includes a tubular portion (18) and a mounting portion (20) that extends from the tubular portion (18). The tubular portion (18) is sized for holding the tissue roll (16) therein and includes a slot (22) for dispensing tissue fabric therethrough. Moreover, the mounting portion (20) is intended to attach the tissue-dispensing apparatus (10) to a wall, a door, a bathroom stall partition, or other suitable mounting surfaces.
